

News from the Network of Biodigesters for Latin America and the Caribbean REDBioLAC

The [REDBioLAC website](http://redbiolac.org) presents wide information on the results of the 5th Network Meeting, held in October 2013 at Zamorano University in Honduras. The event was attended by 84 professionals from Nicaragua, Peru, Chile, Argentina, Mexico, Honduras, Cuba, Costa Rica, Mozambique, Germany, the Netherlands, Cambodia, Colombia, Peru, Bolivia, Spain, USA, Switzerland, Guatemala, Panama, Tanzania and France. Issues related to technological innovation and the use of various substrates, at different scales and uses both the biogas (productive uses, domestic use, industrial use), and the biol were treated. [Photos of the meeting](#) show the importance of this initiative held in a high level university of Central America.

REDBioLAC is already working for the organization of the 6th international meeting in September 2014 in Colombia, with the collaboration of the [CIPAV Foundation](#) of Cali. Information on the event will be broadcasted on the website of the Network.

REDBioLAC is expanding ever more its professional network involving study centres and institutions interested in adopting these low-cost technologies with high-impact in rural areas. The network of international organizations that support the development of these technologies is also expanding. On the website of the network there is an extensive technical documentation about biodigesters. The website also presents useful documents for the promotion of these technologies and the many advantages in using them, like the [Hivos brochure](#).
