

THE BUSINESS INCUBATOR MAGAZINE

PROMOTING THE TERRITORIAL BIO-DISTRICTS METHODOLOGIES

The [Business Incubator Magazine](#) published a new volume, containing in the page 11 an article on the Territorial Bio-Districts innovative methodologies. The article resumes the key features of this innovative approach to boost organic production, the main results achieved and the methodologies that could be adopted in other interested territories.

Launched in May 2012 and published three times per year, this Magazine features best practices, experiences and thought pieces on local development and enterprise creation.

The Magazine is diffused in the EBN network that associates more than 250 *Business Innovation Centers* operating in the territories of various European countries. The magazine is also diffused in the ILSLEDA network that associates more than 60 Local Economic Development Agencies operating in 25 countries. Through these important networks of structures supporting local economies, the innovative methodologies of Bio-districts may be widely known and generate interest in their use.

The Magazine is free to download. All issues and online content can be accessed free of charge thanks to the contributions of International Links and Services for Local Economic Development Agencies (www.ilsleda.org); European BIC Network (www.ebn.eu); European Space Agency (www.esa.int) and United Kingdom Business Incubation (www.ukbi.co.uk).
