

THE INNOVATIVE TECHNICAL SOLUTIONS OF THE EMPOWERING PEOPLE NETWORK

The [Empowering people Network](#) is one of the activities of the Siemens Stiftung Foundation. The Network aims to identify and foster innovative technology that endeavors to solve problems in basic supply around the globe.

The Siemens Stiftung Foundation is a non-profit organization that promotes sustainable social development. In collaboration with its partners the Foundation develops and implements solutions and programs to support this effort, with technological and social innovation playing a central role.

In particular, the Empowering people Network connects inventors and entrepreneurs from around the world who work on technical solutions that are implemented using entrepreneurial models to improve basic services in developing regions. To support these promising solutions, the network aims to transfer knowledge and spread the word to potential supporters and users to effect better basic services for more people.

In the Network website information about a wide range of innovative technologies in the fields of water and waste water, water management and recycling, energy, food and agriculture, housing and construction is available.
