

The Global South South Development Academy

Sharing Innovative Experiences

The [Global South-South Development Academy](#), created in the framework of the UNDP [Special Unit for South South Cooperation](#), is an online action-oriented service platform that facilitates access to Southern development solutions and Southern expertise for learning and application.

The GSSD Academy offers and develops tested tools, methodologies and partnership strategies that enable practitioners and Southern partners to identify, document and catalogue Southern development solutions with quality assurance through broad-based peer-review processes.

One of the tools of the Academy is the online service that presents the practices published in the 19 volumes of the series [Sharing Innovative Experiences](#)

Entering the page *Find Solutions*, it will be possible to indicate issue of interest and e-mail address, in order to receive all available information.
