

ORGANIC INNOVATION DAYS CALL FOR INNOVATIONS IN THE ORGANIC SECTOR

On 1 and 2 December 2015, The [European Technology Platform of TP Organics](#) for organic food and farming research will organise the Organic Innovation Days. One of the main aims of the event is to demonstrate the innovation potential of the organic food and farming sector.

TP Organics therefore launches a call challenging farmers, researchers and companies to propose innovative solutions to one of the following needs of the organic sector:

- Innovative technologies for pest management in organic cropping systems
- New organic food processing concepts and technologies
- New business models of value addition at the local level

These are three priority topics identified by the TP Organics Strategic Research and Innovation Agenda. After a pre-selection of the submitted innovations by the TP Organics Secretariat, a TP Organics member will be asked to select the most promising one. The proposer of the selected innovation will be invited to present it at the Organic Innovation Days. A lump sum will be provided to cover travel costs. All innovations submitted will be promoted through the website of TP Organics.

You can send your innovation to info@tporganics.eu. Deadline is 6 September. You can find the description of the call as the preliminary programme of the Organic Innovation Days in the [TP Organics website](#).

TP Organics is the European Technology Platform (ETP) for organic food & farming, uniting large companies, small & medium enterprises, researchers, farmers, consumers and civil society organisations active in the organic value chain from production, input & supply, to food processing, marketing and consumption.
